

Our Client is a well-known mining and processing company, maintaining operations at 13 North American locations and headquartered in the Southwest. TNS Partners, Inc. has been retained to identify and recruit executives to join the organization as Chief Geologist.

The Chief Geologist will be responsible for identification, justification and acquisition of reserves; supporting mine planning activities and supporting mine operations.

Qualified candidates must possess the following:

- 10+ years of career experience in carbonate-oriented geology activities.
- 3+ years leading geologic modeling and/or mine planning for a subsidiary, division or group of mines.
- Ability to relate technical geologic information to an audience possessing the full range of knowledge, or lack thereof, on these matters.
- Undergraduate degree in Geology and preferably possessing a graduate degree in a technical or business discipline.
